Venkata Saikrishna Kodapaka

Lead Java Developer (Backend) with 12+ years of experience
kvsaikrishna.iiitn@gmail.com, LinkedIn +91 8985065478

HIGHLIGHTS

- **Primary Skills:**
  - Software: Java, Microservices, SQL
  - Frameworks & Tools: Spring Boot, Spring Data JPA, Hibernate, RESTful webservices, Kafka, ELK, Git, Postman, Jenkins, Splunk, SonarQube, Docker, Kubernetes
- **Domains:**
  - Investment Banking, Product Development, e-commerce

SUMMARY

- Highly experienced, solution-oriented professional with more than 12 years of application development
- **Around 12+ years** of experience in application development in the areas of advanced **Java** with strong knowledge of **Microservices, J2EE, Spring Boot, Spring Data JPA, Multithreading, RESTful API, Kafka, Distributed systems**
- Experienced in **Data structures** and **Problem solving**
- Hands-on experience in **Jenkins, Ant, Maven, CVS, SVN, Git, Bitbucket and SonarQube**
- Strong knowledge of writing queries in **Oracle, Postgres and MySQL**
- Good knowledge on working with **NoSQL** databases
- Worked in DevOps model (CI/CD) to carry out deployments to Local/ UAT/ PROD environments by Jenkins
- Delivered projects in both Agile and iterative models with a strong understanding of Agile deliverables
- Handled the setup of **Jenkins** CI integration for DEV and QA environments to automate the builds to run **Sonar** and code coverage
- Played customer facing roles with a proven record of efficiently handling teams working in onshore-offshore model
- Developed various reusable tools, with the key ones an alerting system to send alerts using **ELK (ElasticSearch, Logstash** and **Kibana)**
- Integrated third-party photo card customization builder which improved the organization's revenue by 15%.
- Implemented limited year book promo code feature and yearbook wait list features which increased 30% yearbook sales.
- Integrated POS app code with third-party credit card payment API integration which helped 25% POS sales increment.
- Showcased keenness to experiment with multiple programming languages throughout work experience
- Dedicated and highly ambitious to achieve personal as well as organizational goals
- Demonstrated excellent verbal and written communication skills with a proven enthusiasm in extra-curricular activities

Achievements:

- Received multiple “Star of the Month” awards in ValueLabs
- Received multiple appreciations awards in Triniti, received accolades from customer for Clinical Support Process definition for Application Object Migrator tool
- Received appreciation from Jostens for playing instrumental role in successful mobile app integration with Credit card payment with multiple modes
- Multi-hackathon winner, including Winner of the Q1 Tech For Good Hackathon 2026 and Runner-Up in the IDP Hackathon and Q2 Hackathon 2026. Recognized as a Culture Champion (2026)

EDUCATIONAL QUALIFICATION

- Bachelor of Technology (Computer Science and Engineering), Rajiv Gandhi University of Knowledge Technologies (RGUKT), IIIT, Nuzvid

TRAININGS/ CERTIFICATION

- Certified in Microsoft Azure Fundamentals (AZ-900)

PROJECT EXPERIENCE

Lloyds Technology Centre **Jul'25 to till date**

Designation: Senior Software Engineer

Project: Rates Data Aggregator (RDA) **Jul'25 to till date**

Role: Senior Java Developer

Responsibilities:

- Application design and development
- Performing code reviews and maintaining standards, guidance
- Working on BAU activities, such as PROD and UAT support/release activities

Environment: Java, SpringBoot, Kafka, Docker, Harness

Wells Fargo **Dec'22 to Jun'25**

Designation: Senior Software Engineer

Project: Vasara – Enhanced Market Risk (EMR) **Dec'22 to Jun'25**

Role: Senior Java Developer

Responsibilities:

- Application design and development
- Performed reviews and maintaining standards, guidance
- Developed testing framework for the integration testing with data systems
- Developed tools to help faster Go live of Risk matrix
- Worked on BAU activities, such as PROD and UAT support/release activities

Environment: Java, Spring, Akka, Ignite, HBase, Azure

ValueLabs **Jan'20 to Nov'22**

Designation: Program Manager

Project: Jostens(e-commerce) **Jan'20 to Nov'22**

Role: Lead Java Developer

Responsibilities:

- Application design and development in Microservices environment
- Performed reviews and maintaining standards, guidance
- Worked with quality assurance team to deliver the final product
- Conducted code reviews, unit test cases reviews

Environment: Java, Spring, Oracle, Maven, Jenkins, GitLab

PruTech **Dec'18 to Dec'19**

Designation: Senior Software Engineer

Project: Identification and Access Management (IAM) **Dec'18 to Dec'19**

Role: Senior Java Developer

Responsibilities:

- Application design and development
- Performed reviews and maintaining standards, guidance

- Trained new resources/other teams
- Worked with quality assurance team to deliver the iterative product
- Conducted code reviews, unit test cases reviews
- Worked on process improvements and optimization initiatives

Environment: Java, Spring Boot, Spring Data JPA, Microservices, OAuth2, FreeMarker, Docker, AWS EKS, MySQL

Triniti **Jun'14 to Nov'18**

Designation: Lead Member Technical Staff
Project: Application Object Migrator **Apr'17 to Nov'18**
Client: SunPower, Novanta, Power Integration
Role: Lead Java Developer
Responsibilities:

- Conducted RCA of the issue detected
- Handled defect resolution and triage meetings
- Prioritized and assigned work to the team members
- Conducted code reviews, unit test cases reviews
- Led process improvement and optimization initiatives

Environment: Java, JSP, Servlets, Tomcat, XML, PL/SQL, Oracle

Designation: Member Technical Staff **Apr'16 to Mar'17**
Project: Issue & Task Management
Role: Senior Java Developer
Responsibilities:

- Developed user stories in Java and PL/SQL.
- Developed APIs for business portal
- Analyzed the performance related issues
- Analyzed causal analysis reports and improvement plans

Environment: Java, JDBC, jQuery, HTML, PL/SQL, Unix, Oracle

Designation: Associate Member Technical Staff **Apr'15 to Mar'16**
Project: Project Management
Role: Java Developer
Responsibilities:

- Developed user stories in Java
- Used Microsoft Project for Tasks management
- Tested and modified the Procedures and views
- Supported the deployment activities
- Involved in unit testing, documentation

Environment: Java, Microsoft Project, XML, PL/SQL**,** Oracle

Designation: Associate Trainee **Jun'14 to Mar'15**
Project: Upgrade Pack
Role: Java Developer
Responsibilities:

- Developed user stories in Java and UI
- Performance tuning at PL/SQL scripts
- Tested and modified the Procedures and views
- Supported the deployment activities
- Involved in unit testing, documentation

Environment: Java, JSP, CSS, XML, JDBC, Unix, PL/SQL**,** Oracle
